WORK EXPERIENCE

Backend AI Engineer Intern — FlyRank AI **Jul 2026 – Oct 2026**
- Engineered usage-based billing infrastructure for LLM applications, tracking tenant quotas, token consumption, idempotent requests, and micro-usage pricing with TypeScript, Fastify, and PostgreSQL.
- Integrated Stripe billing and webhook processing with automated test coverage for quota enforcement, usage accounting, checkout flows, billing events, and billing state updates.

Full-Stack Web Developer Intern — Sort Outsourcing Solutions Inc. (Sortr) **Jun 2026 – Sep 2026**
- Built internal tools for **30+ employees**, including an automated IT service desk and employee time-tracking system that consolidated work-hour data for HR attendance and payroll preparation.
- Redesigned and optimized WordPress production pages, improving responsive layouts, content structure, technical SEO, image delivery, and overall frontend performance.

Freelance Full-Stack Developer — Self-Employed / Project-Based **Dec 2025 – Present**
- Delivered custom full-stack systems for 10+ business and academic clients, replacing manual workflows across attendance, operations, reporting, and data management.
- Built and deployed production applications used by dozens to hundreds of users, covering authentication, database-backed workflows, reporting, and operational tools tailored to each client.

PROJECTS

UA LabSign — University Laboratory Attendance | Next.js, TypeScript, PostgreSQL, React Native, Expo
- Engineered a web and Android attendance platform designed for hundreds of students, 20+ faculty members, and university administrators, replacing paper-based laboratory attendance with centralized digital workflows.
- Designed a device-bound attendance protocol combining ECDSA P-256 signatures, GPS geofencing, institutional Google authentication, and expiring session PINs to verify identity, authorized device, physical presence, and active class sessions.

BetterSanFernando — Civic Information & Transparency Portal | Next.js, TypeScript, Tailwind CSS
- Built and maintain a civic-information platform publishing 177 reviewed services, 324 infrastructure projects, and 563 supporting evidence records sourced from verified public information.
- Architected a typed, publication-safe civic data pipeline with schema validation, provenance tracking, automated verification, and strict separation between private research data and reviewed public exports.

Neffi — NFC Digital Business Card Platform | Next.js, TypeScript, PostgreSQL, NFC
- Engineered a single-write NFC architecture using permanent tokenized URLs, enabling customers to update digital profiles anytime without rewriting or replacing their physical NFC cards.
- Launched the platform from NFC provisioning through customer activation and self-service profile management, progressing to real customer deployments and paid NFC card orders.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, Vue.js, Angular, React Native, Expo
Backend & Databases: Node.js, Nest.js, Express.js, FastAPI, PHP, Laravel, Java, Python, PostgreSQL, MongoDB
Tools & Platforms: Jest, Vitest, Playwright, Postman, Git, GitHub Actions, Vercel, AWS, Figma, WordPress

EDUCATION

Holy Angel University **2023 – Expected Graduation: 2027**
Bachelor of Science in Information Technology, Major in Web Development
- **Academic Honors:** Consistent Dean's and President's Lister, A.Y. 2023-2026
- **Certifications & Training:** CompTIA IT Fundamentals (ITF+), AWS Cloud Foundations (AWS Academy), freeCodeCamp (Responsive Web Design, JavaScript Algorithms, Back End Development).
